DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1- 34, drawn to a method of renting equipment, classified in class

705, subclass 28.

II. Claims 35-48, drawn to a computer system, classified in class 709,

subclass 1+.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The

inventions are distinct if it can be shown that either: (1) the process as claimed can be

practiced by another materially different apparatus or by hand, or (2) the apparatus as

claimed can be used to practice another and materially different process. (MPEP §

806.05(e)). In this case invention I can be practiced by human intervention by tracking

using visual confirmation of equipment.

Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Page 2

Art Unit: 3627

In addition, if Group I is elected:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species drawn to location feature defined by claims 2/19;

Species drawn to reservation type defined by claims 3/4, 20, 21;

Species drawn to route feature defined by claims 5/6, 22/23;

Species drawn to an alert feature defined by claims 7/8, 24, 25;

Species drawn to one way feature defined by claims 9/23,26;

Species drawn to detail search feature defined by claims 9/23,26;

Species drawn to dispatch update feature defined by claims 11/28;

Species drawn to update receipt feature defined by claims 11/28;

Species drawn to safety feature defined by claims 16 33.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

In the event that applicant elects Group II above;

Species drawn to a scope selector claim 36;.

Species drawn to reservation type defined by claim 37;

Species drawn to filed searchability feature defined by claim 40;

Species drawn to an alert feature defined by claims 39;

Species drawn to a search request window defined by claim 41;

Art Unit: 3627

Species drawn to detail search feature defined by claim 42;

Species drawn to dispatch update feature defined by claim 43;

Species drawn to hook up field defined by claim47;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 35 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
